

DUPAGE COUNTY BUSINESS FORUM

Prosperity is by design, and technology is the tool that makes it reality.

This year's topic is designed around digital technology, and how it affects and enhances business of all types and sizes. This program will outline the opportunities that digital technology brings: highlighting the benefits (like marketing and business operations), drawing attention to the challenges (like privacy and security breaches), and giving business owners the tools to balance both aspects.

Register below to keep your finger on the pulse of the ever-changing business landscape.
